Notice of Request for Motion to conduct Mental Health Evaluations

Case No. 16-11767

Dear Judge Alston,

Bizarre and erratic behavior exhibited by lawyers administering the Northwest Territorial Mint LLC case have caused me and creditors much harm. The Trustee, Calvert and his lawyers with fiduciary duties have exhibited similar behavior causing much grief, distress and hardship against inhabitants on the land of Washington and other state land. I believe madness or mental conditions have taken hold on the minds of the lawyers.

I have thought about filing BAR grievances first with this information, but have decided that possibly you still have a sound mind. I request an ethical and professional duty in equity.

Thanks to you and the US Trustee, I have this option left of writing a letter to you requesting that you put in a motion for me to have full mental health evaluations ordered for every lawyer working this case in and out of the government, public and private lawyers assigned to this case.

If you are disabled in some way by United States codes or professional ethics from putting in a motion for me then I request that you find a lawyer who can put in a motion for this request and move the court to conduct thorough mental health evaluations on the lawyers/attorneys in this case 16-11767.

Thank you for your attention to this request,

Best regards,

FOR: JEFFREY M MCMEEL  an Indian not taxed.
